SUNVIZOR SYSTEM

## Features and benefits of Levolux's Sunvizor system:

**Aesthetically pleasing** – Can be manufactured in a variety of materials and sizes to enhance the look of the building.

**Lightweight** – The system is extremely versatile for use on almost any building, new or existing.

**Reduces energy costs** – Limits the need for air-conditioning which helps reduce the impact on the environment.

**Flexible** – Louvres can be spaced to allow more or less natural light into the space and hinged for easy access and maintenance.

Brunel University, West London

New River Village, Hornsey

## General Description

The Sunvizor system is available in a variety of sizes and in either Aluminium or Timber.

The Louvres in the system can be fixed at varying angles and pitches, and can be hinged to allow for access and cleaning of the glazing as necessary.

The system comprises of the following elements:

Aluminium headrail – Allowing the system to fit securely to the building and to pivot for window cleaning.

Aluminium drop rods – These hold the Louvres in place at the specified angle and pitch.

Louvres – Available in custom sizes and a variety of materials.

Bottom rail – Can be supplied with standard fixed fixings or locking assemblies.

End-caps – The head and bottom rails can be fitted with colour-coordinated end caps for a truly bespoke finish.

## THREE-YEAR WARRANTY

All Levolux systems are made with high grade materials to exacting specifications. This enables us to provide a guarantee providing free of charge replacement parts should any system prove defective within three years of installation. This guarantee is conditional on the manufacturers recommended fitting and operating instructions having been followed.
