

STATEMENT OF COMPANY ENVIRONMENTAL POLICY

It is the policy of Levolux Limited (hereinafter written as Levolux) to conduct its undertaking in accordance with relevant statutory environmental requirements and to implement appropriate safeguards to minimise risks to local and global environments. This Policy will be actively pursued by the Directors and line management.

In particular Levolux will endeavour to minimise, and preferably prevent, all types of pollution so far as is reasonably practicable. As a minimum, Levolux will comply with all environmental legislation applicable to Company activities and to all other requirements to which the Company subscribes. In order to ensure compliance with legislation, Levolux will commission an independent legal compliance audit to be undertaken on an annual basis. It is our intention to continually improve our environmental performance.

Levolux recognises the importance of minimising the amount of waste generated, and of reducing the consumption of gas, electricity and other fuels and will evaluate the carbon footprint of its activities. The application of a suitable and effective Environment Management System (EMS) is integral to the achievement of the above objectives.

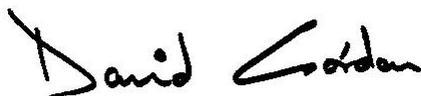

In furtherance of these aims, the Company will introduce and maintain systems of work which will ensure that environmental issues are considered at all stages of work, from conception, design and planning (where appropriate) through to execution of the works on site and subsequent maintenance and repair. Employees of Levolux will receive appropriate training in these systems of work to a level that is appropriate to their activities and subsequent environmental risks.

The Company recognises the need to consult with its workforce on environmental matters in order to achieve policies which are effective and acceptable when put into practice. Our Policy is documented, implemented, maintained and communicated to all employees. We welcome suggestions from employees which serve to improve and promote our aims. Such suggestions may at any time be brought to the attention of line and senior management.

Whilst overall responsibility for environmental matters must rest at the highest management level within the Company, employees should recognise that they too have duties under this policy and legislative requirements. These duties include the need to minimise the generation of waste, reduce energy consumption and appropriately dispose of waste in line with Company safe systems of work.

This policy will be kept up to date. To ensure this, the Policy and the way in which it has operated will be reviewed on an annual basis. Any revision will be brought to the attention of those affected by the changes. Our Environmental Policy is available to the public on request.

For and on behalf of Levolux Limited

David Gordon – Divisional Managing Director
